

# ***Styrofoam Recycling Guide***

**You Can Recycle the Following Styrofoam Products:**

**Lightweight styrofoam that  
breaks into beads easily  
when bent**

**Packing peanuts of  
all colors**

**Styrofoam Egg  
Cartons**

# Why Can't We Accept All Styrofoams?

- Our buyers establish what is acceptable for the markets. For example, polyethylene (styrofoam that does not break easily when bent in half) is not recyclable at our center.
- Styrofoam meat trays can contain raw meat liquids which are a health hazard for our recycling center crew.

If it breaks like this, we can take it.

**Tip!** If you are unsure if your styrofoam is acceptable, speak with one of the recycling center crew members.
